

LIGHT ASSEMBLIES [*BULKHEAD WITH OPTIONAL GRID*]

EWEB 2160

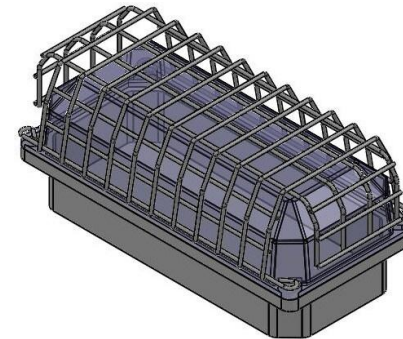

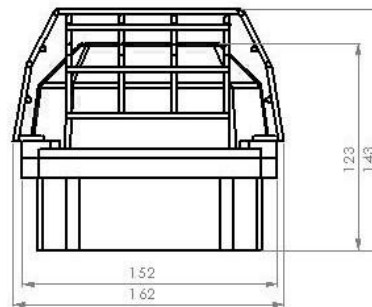

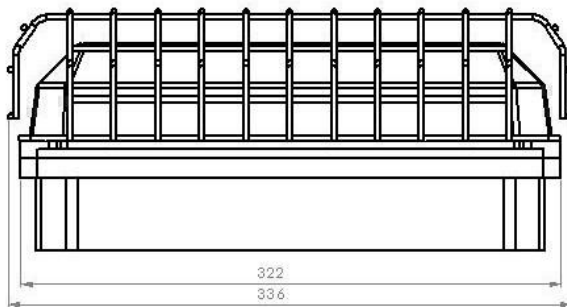

DESCRIPTION:

The main casing is of cast metal, with a high quality white finish that will not scratch or damage easily. The lens is of clear plastic which is durable and will not break easily. A strong wire grid is also mounted over the lens of the unit, providing additional protection against physical damage. The units are equipped with soft starting ballasts which greatly increases lamp life. These lights are very efficient and supply a large amount of light for the minimum of current requirements.

FEATURES:

- Over Voltage Protection
- Voltage Surge Protection
- Current Surge Protection
- Reverse Polarity Protection
- Sturdy Construction
- Vandal-proof
- Surface mount model available
