

LIGHT ASSEMBLIES [*Glass Oval Bulkhead*]

EWEB 2180

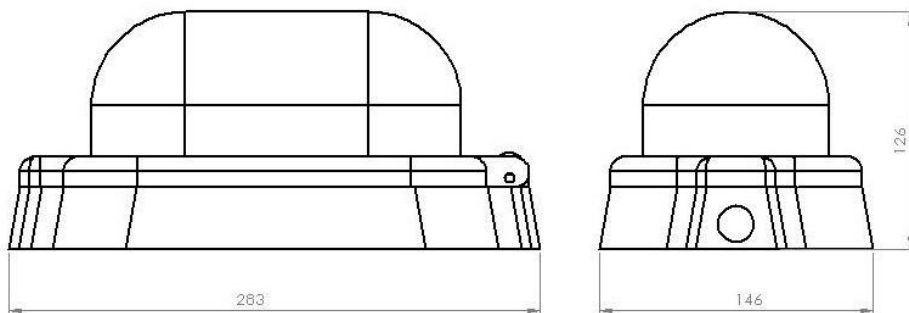

DESCRIPTION:

The main housing is of cast metal, powder coated grey for a durable and scratch resistant finish. A strong hinge allows the main casing to open, providing access to the interior of the unit. Four mounting holes are provided in the main casing beneath the lid, making secure mounting possible, as the unit cannot be provided without opening the lid. A gland hole is provided for wiring of the unit. A thick glass lens covers the lamp. The glass is ribbed on the inside for better light diffusion. A rubber seal protects the lens against damage due to vibration and prevents liquids from entering the unit.

FEATURES:

- Under voltage Protection
- Over voltage Protection
- Reverse Polarity Protection
- Voltage Surge Protection
- Current Surge Protection
