

HEATING PRODUCTS *[Diesel loco heater fan assembly]*

EWEB 6252

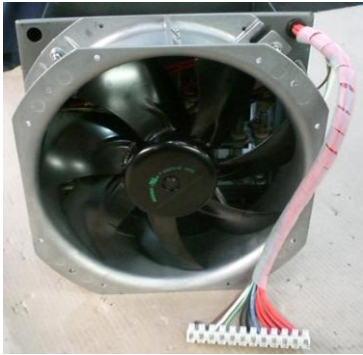

DESCRIPTION:

The heater is constructed of a robust sheet metal enclosure specifically made to accommodate the heating element, fan, temperature sensor controller and temperature controller. Air is drawn in and blown out of a mesh structure cut into the casing, creating a durable and safe cover to prevent injury to personnel and damage to equipment.

FEATURES:

- Ambient temperature from -5°C to 50°C
- Fan circulates air at 1000 cubic meters per hour
- No asbestos or other banned and hazardous materials are used
- 4 x 750W Elements

SPECIFICATION SHEET:

SPECIFICATIONS	DATA
ELEMENT INPUT VOLTAGE	74Vdc
NUMBER. OF ELEMENTS	4
ELEMENT WATTAGE	750W / ELEMENT
ELEMENT RESISTANCE	$\pm 8.0 - 8.5\Omega$
FAN INPUT VOLTAGE	74Vdc
OVER-TEMP. PROTECTION	80°C
